

Phase 4 Practice Project

Team Budget Planner

Writeups

Overview

The Budget Planner Web Application is designed to assist finance teams and program managers in managing and retrieving annual budget details.

The application consists of three HTML documents –

index.html, financeTeam.html, and programManagers.html - along with their corresponding JavaScript files (financeTeam.js and programManagers.js).

File Structure

1. index.html

The entry point of the application. It provides links to navigate to the "Program Managers" and "Finance Team" sections.

Usage:

Open index.html in a web browser.

Click on the "Program Managers" or "Finance Team" links to navigate to the respective sections.

2. financeTeam.html

This page allows users to view annual budget details stored in the session storage.

Usage:

Open financeTeam.html in a web browser.

Click the "Get Budget Details" button to retrieve and display the stored annual budget details.

3. financeTeam.js

JavaScript file associated with financeTeam.html. It contains the retrieveData() function to fetch and display annual budget details.

4. programManagers.html

This page allows program managers to add new budget details.

Usage:

Open programManagers.html in a web browser.

Fill in the form with client name, project name, and budget.

Click the "Add Data" button to store the entered budget details.

5. programManagers.js

JavaScript file associated with programManagers.html. It contains the addData() function to add new budget details to session storage.
